

Olena Pustynska

Interior Designer / Decorator

Email: darisher40@gmail.com

Phone: 07449233561

Highly-qualified designer, with an extraordinary experience. A passionate, and creative professional with 28 years of international experience, working on high-end residential and commercial interiors and environments. My goal is to obtain a job as an Interior Designer or Decorator in the UK.

Skills

- Successfully working within the constraints of a limited budget, a small surface, and the need to accommodate all the necessary multi-functional units within a limited space, to guarantee a decent result for a small amount of money.
- Using design skills and tools to correct and transform flaws of an interior, thereby improving the overall impression of the interior.
- Able to solve difficult accomplishment tasks set by the client in a given room.
- Creating non-standard planning solutions
- Decorating display-windows, new products and collections placement, which allows the creation of a certain image and mood in the exposition, and as a consequence, attracts new customers.
- Develop schemes of individual furniture for the specific interior.
- Developing style and image concepts for various events, with the creation of decorative elements especially for the event.
- Creating decorations using different techniques, including the author's techniques.
- Preparing and composing a pre-sale design of houses, which allows to radically change the overall space of the interior, to present the building to potential buyers in the best way, with minimal cost and investment.

- Successful application and knowledge of the techniques of decorative stained-glass, tapestry, macramé, [paper-plastic](#), and batik, as well as 2 self-developed techniques, the use of which allows giving a unique look to an interior.
- Creation of unique decorative elements for gift wrapping and presents for an individual client's event.
- Creation of customised interior elements, based on the general stylistics of the room, the colour solution and the technical requirements of the customer.
- Using the rules of ergonomics in the interior as a priority in the work on the project, and allows the creation of a safe and comfortable environment for the client.
- Applying psychological analysis when working with a client and on a project, in order to reflect the personality of the client in the interior, and match their personal requirements and comfort.
- Strict adherence to the functional relations and building regulations: working in-depth on the functional relations of spaces, as well as their compliance with building regulations and guidelines.

Work Experience & Projects

- 2001 – 2005: Lead Designer of Design Studio “Khatynka”, company Alex-RLH, Ltd.
- 2005 – February 2022: Co-owner & Lead Designer at Design Studio “Khatynka”.

During this time, the following projects have been created:
